Subject: agenda/documents for distribution to CCAC

Joe,

Please circulate these documents and this note to the CCAC. Thank you.

CCAC members: I am forwarding 2 attachments in advance of the June 15 meeting:

1. A "draft" agenda for 6/15/2011.
2. A summary of the "Safety Issues" from our last meeting. It was far more difficult to glean all of the issues from our conversation. Since we cannot change the "building code" for structural requirements, these issues occur are primarily a set of questions we feel are relevant to the committee's overall charge. If I have omitted key issues that cannot be subordinated to this general list, please let me know. If you have questions/issues not part of this list or part of our last meeting, then you may raise them at the next meeting.

I will forward this list of "safety issues" to our consultant, Kevin Bauman, for the 6/15 meeting.

3. An amended copy of the "Summary of Issues and Concerns" document circulated last time, with proposed changes of language and with the above "safety" issues added, to have them in a complete document. Copies will be made available at the 6/15 meeting.

Thank you.

David Payne
