## Noninsured Crop Disaster Assistance Program (NAP)

USDA's Farm Service Agency's (FSA) Noninsured Crop Disaster Assistance Program (NAP) provides financial assistance to producers of noninsurable crops when low yields, loss of inventory or prevented planting occurs due to natural disasters.

## Eligible Producers

An eligible producer is a landowner, tenant or sharecropper who shares in the risk of producing an eligible crop. The annual gross revenue of the eligible producer, or the annual gross revenue of any individual or entity combined as one "person" with the eligible producer, cannot exceed \$2 million.

## Eligible Crops

To be eligible for NAP assistance, crops must be noninsurable crops and agricultural commodities for which the catastrophic risk protection level of crop insurance is not available, and must be any of the following commercially produced crops:

- crops grown for food;
- crops planted and grown for livestock consumption, including, but not limited to grain and forage crops, including native forage;
- crops grown for fiber, such as cotton and flax (except for trees);
- crops grown under a controlled environment, such as mushrooms and floriculture;
- specialty crops, such as honey and maple sap;
- value loss crops, such as aquaculture, Christmas trees, ginseng, ornamental nursery and turfgrass sod;
- sea oats and sea grass; and
- seed crops where the propagation stock is produced for sale as seed stock for other eligible NAP crop production.

Please contact a crop insurance agent if you have questions regarding whether a crop is insurable in your county. For further information on whether a crop is eligible for NAP coverage, please contact your local FSA office.
