

Taxable Sales Growth Rates

The Florida Department of Revenue (DOR) administers Florida's Sales and Use Tax. Retail establishments file monthly tax returns with DOR reporting gross sales, taxable sales and sales tax collected. The tax applies to sales of goods with major exemptions for food for later consumption, medical supplies and residential utilities. Most services are not taxed. DOR estimates that taxable sales account for 40% to 45% of all retail sales. Monthly data are subject to large fluctuations due to seasonality and random variation. This graph presents annual data that avoids monthly volatility. Taxable sales data are more commonly quoted than gross sales data (these data include exempt sales).
