Comment/Suggestion:

WE SUPPORT ANY MOVEMENTS TO PROTECT OUR WATERSUPPLIES FOR THE PRESENT AND FUTURE GENERATIONS. WE ALSO FEEL THAT PART OF THE LONGTERM ASSURANCES FOR HIGH QUALITY WATER SUPPLIES SHOULD INCLUDE RESTRICTIONS ON FURTHER DEVELOPEMENT OF HIGH DENSITY HOUSING.

<p>Comment/Suggestion:</p> <p>Please keep in mind that the Thonotosassa Community Plan proposes to increase densities in the entire Thonotosassa study area to one home per acre, with a one acre minimum lot size. I am concerned that this increase in density will negatively impact the groundwater and surface water, and the environment. I would suggest that higher densities be required in and surrounding water-sensitive areas.</p> <p style="text-align: right;"><i>Please continue on back →</i></p>
