

# GREEN THEME

## DID YOU KNOW?...

- Energy-efficient compact fluorescent lamps (CFLs) use up to 75% less energy than incandescent light bulbs
- Using a CFL instead of an incandescent bulb saves about \$30 in energy costs over the life of the bulb
- The life of a CFL can be up to 10 times longer than the life of an incandescent bulb
- CFLs do contain small amounts of mercury which is a hazardous material

**Used, unbroken CFLs may be taken to the County's Household Chemicals and Electronics collection sites or to any Home Depot store for disposal**
