

Earth Day - Every Day

DID YOU KNOW?

- More than a third of all the paper in the world that is recovered for recycling is recovered in the U.S.
- In 2003, the paper industry in the U.S. achieved its goal of recovering 50% of all paper
- The industry has set a new goal of recovering 55% of used paper by 2012
- **A ton of paper made from recycled fibers instead of virgin fibers saves:**
 - 7,000 gallons of water
 - 17-31 trees
 - 4,000 KWh of electricity
 - 60 pounds of air pollutants
