

INTENT STATEMENT

This proposed Text Amendment would require applicants for development of land that includes gopher tortoise habitat to provide a gopher tortoise burrow survey prepared by a FFWCC (Florida Fish and Wildlife Conservation Commission) authorized agent and to report any previous violations of gopher tortoise regulations in the State of Florida. This Text Amendment will also provide for consideration of smaller lot size requirements for developments that preserve on-site significant wildlife habitat beyond the minimum required by the Land Development Code (LDC) and increase penalties for unpermitted land alterations to significant wildlife habitat.
