## **Comment on Hillsborough County Technical Manuals and Specifications through June 30**

The comment period for Hillsborough County technical publications is open through June 30, 2021, as part of the official bi-annual update.

Comments and recommendations on Public Works and Public Utilities technical manuals and specifications are being accepted online at

[Public Utilities and Public Works Technical Publications Comments and Recommendations](#)

Current versions of the publications are available online at

[Public Works Publications](#)

[Public Utilities Publications](#)

### **Revision Procedures**

Any comments received after June 30 may not be included in this cycle of updates. In August, proposed manual and specification revisions will be posted and presented in open workshops for discussion with industry and the public. Changes will be reviewed and approved in September. The updated manuals, with the adopted changes incorporated, will be published in October 2021.

Technical criteria, specifications, and County policies must periodically be modified in order to meet developing technology, changing criteria, and new design philosophies. Hillsborough County has adopted a two-year cycle for updating all technical publications on odd numbered years. Recommendations are evaluated for merit and proposed changes are offered for review and feedback by the industry. All changes are administered and approved under the supervision of the County Engineer and the Director of Public Utilities.

### **Publications**

The following publications are included in the update cycle:

- Public Utilities - Standard Pump Station Drawings
- Public Utilities - Water, Wastewater, and Reclaimed Water Technical Manual
- Public Utilities - Water, Wastewater, and Reclaimed Water Technical Specifications
